## PROFESSIONAL SUMMARY

Offensive Cybersecurity Expert and Automation Architect with 5+ years of experience. I design robust and secure On-Premise solutions for executives and critical organizations. My approach fuses open-source intelligence (OSINT), rigorous penetration testing, and intelligent workflows (n8n, local AI). With over 200 delivered automations and 100% of clients protected, I transform the operational resilience of organizations (Finance, Gov, Fintech) while ensuring absolute data confidentiality (air-gapped infrastructure, COBAC compliance).

## CORE COMPETENCIES

### CYBERSECURITY & SECOPS

Pentest & Red Teaming

OSINT & Threat Intel

Compliance (COBAC, PCI-DSS)

DevSecOps / CI/CD

Air-gapped Architecture

### AUTOMATION & AI

n8n (Certified L1/L2)

Python & Bash

Local AI Agents (Mistral)

OCR & Webhooks

On-Premise Pipelines

## MAJOR CASE STUDIES

### Financial Sector — Automation & COBAC Compliance

- Comprehensive SecOps audit of a regional bank with proactive vulnerability remediation.
- Deployment of an On-Premise n8n pipeline generating regulatory reports with zero non-compliance for 1 year.

### Government Institution — OSINT & Threat Detection

- Implementation of an automated intel cell (Mistral AI + n8n) against targeted phishing.
- Detection and neutralization of 2 critical campaigns, hardening of administrative access.

### International Logistics — Securing Customs Flows

- Creation of an automated customs document validation pipeline with local OCR extraction.
- 100% fraud reduction on a volume of over 200 daily shipments.

### Emerging Fintech — Pentest & PCI-DSS Certification

- Intensive black-box pentest, remediation of 5 critical 0-day flaws.
- Technical support until obtaining PCI-DSS certification, integration of DevSecOps scans into CI/CD.

## Consulting Firm — Cyber Intel Autopilot On-Premise

- Design of an autonomous economic intelligence agent, 100% air-gapped to ensure client confidentiality.
- Total automation of deliverables, generating over 120 hours saved per week.

## PROFESSIONAL EXPERIENCE

### SecOps & Automation Architect (Digital Bodyguard)

Independent / OffensiveSkills

2019 – Present (5+ years exp.)

- Auditing and securing critical infrastructures, deploying AI agents for Threat Intelligence.
- Creating secure automations, training technical teams, and designing incident response plans.

## PROFESSIONAL CERTIFICATIONS

#### n8n Certified Workflow Creator (L1 & L2)

n8n • 2025

#### Red Team Operations Management

Red Team Leaders • 2026

#### Threat Intelligence & Governance Analyst

Red Team Leaders • 2026

#### Cyberzone Certified Pentester (CCP)

CyberZone • 2025

#### Cisco Ethical Hacker

Cisco Networking Academy • 2025

#### Cybersecurity Educator Professional

Red Team Leaders • 2026
